Info Gap: The Bundle

Problem Card 1

A bundle of wax print cloth is purchased. Some is used to make a head wrap and some is used to make a lapa. The rest goes to the tailor to make a shirt.

How much wax print cloth goes to the tailor to make a shirt?

Info Gap: The Bundle

Data Card 1

- The cloth in the bundle is a rectangle.
- The cloth in the bundle is 18 feet by 4 feet.
- The head wrap is made from a rectangle of cloth that is 2 feet by 6 feet.
- The lapa is made from a rectangle of cloth that is 7 feet by 4 feet.

Info Gap: The Bundle

Problem Card 2

Ribbon is sewn around the perimeter of the lapa and the bottom of the shirt.

How much ribbon is needed altogether to decorate the lapa and the shirt?

Info Gap: The Bundle

Data Card 2

- The piece of cloth used for the lapa is a rectangle.
- The piece of cloth used for the lapa is 7 feet by 4 feet.
- The bottom of the shirt is 3 feet long.
