

Card Sort: Fraction Division  
A

$$3 \div \frac{1}{3}$$

Card Sort: Fraction Division  
B

$$3 \div \frac{1}{4}$$

Card Sort: Fraction Division  
C

$$4 \div \frac{1}{2}$$

Card Sort: Fraction Division  
D

$$4 \div \frac{1}{3}$$

Card Sort: Fraction Division  
E

Jada has 3 cups of granola. One serving of granola is  $\frac{1}{3}$  cup. How many servings of granola does Jada have?

Card Sort: Fraction Division  
F

Noah has 3 liters of orange juice. A serving of orange juice is  $\frac{1}{4}$  liter. How many servings of orange juice does Noah have?

Card Sort: Fraction Division  
G

Priya wants to run 4 miles. The track is  $\frac{1}{2}$  mile long. How many times does she have to run around the track?

Card Sort: Fraction Division  
H

Noah cut a 4 foot long ribbon into pieces that are  $\frac{1}{3}$  foot long. How many pieces are there?

|                                                                                                                                                                                                  |                                                                                                                                                                           |                                                                                                                                                                                                                   |                                                                   |
