

Directions:

- Choose an object.
- Choose a unit to measure the length. (inches, feet, or centimeters)
- Estimate how many units long your object is.
- Measure. Record the actual measurement.

object	unit	estimate	actual measurement
<i>example: crayon</i>	<i>inches</i>	<i>5 inches</i>	<i>3 inches</i>

Directions:

- Partner A:
 - Choose a target length in inches (up to 10) or centimeters (up to 30).
 - Begin to draw a line. Use a straight edge.
- Partner B:
 - Say "Stop!" when you think the length of the line is equal to the target measurement.
 - Both partners measure the line and find the difference between the actual length and target measurement. The difference is Partner B's score for the round.
 - Take turns. Play for 8 rounds. The player with the lower total score wins.

round	Partner A			Partner B		
	target length	actual length	points	target length	actual length	points
