

Lesson 14 Practice Problems

1. A roll of ribbon was 12 meters long. Diego cut 9 pieces of ribbon that were 0.4 meter each to tie some presents. He then used the remaining ribbon to make some wreaths. Each wreath required 0.6 meter. For each question, explain your reasoning.

a. How many meters of ribbon were available for making wreaths?

b. How many wreaths could Diego make with the available ribbon?

2. The Amazon rainforest covered 6.42 million square kilometers in 1994. In 2014, it covered only $\frac{50}{59}$ as much. Which is closest to the area of the Amazon forest in 2014?

Explain how you know without calculating the exact area.

A. 6.4 million km^2

B. 5.4 million km^2

C. 4.4 million km^2

D. 3.4 million km^2

E. 2.4 million km^2

3. To get an A in her math class, Jada needs to have at least 90% of the total number of points possible. The table shows Jada's results before the final test in the class.

	Jada's points	total points possible
Homework	141	150
Test 1	87	100
Test 2	81	100
Test 3	91	100

- a. Does Jada have 90% of the total possible points *before* the final test? Explain how you know.
- b. Jada thinks that if she gets at least 92 out of 100 on the final test, she will get an A in the class. Do you agree? Explain.

4. Find the following differences. Show your reasoning.

○ $0.151 - 0.028$

○ $0.106 - 0.0315$

○ $3.572 - 2.6014$

(From Unit 5, Lesson 4.)

5. Find these quotients. Show your reasoning.

○ $24.2 \div 1.1$

○ $13.25 \div 0.4$

○ $170.28 \div 0.08$

(From Unit 5, Lesson 13.)
