

Directions:

- Choose an object.
- Estimate how many inches long your object is to the nearest inch.
- Measure and record the actual measurement to the nearest  $\frac{1}{4}$  inch.

| object                 | unit          | estimate        | actual measurement                      |
|------------------------|---------------|-----------------|---|
| <i>example: crayon</i> | <i>inches</i> | <i>4 inches</i> | <i><math>3\frac{1}{4}</math> inches</i> |
|                        |               |                 |   |
|                        |               |                 |   |
|                        |               |                 |   |
|                        |               |                 |   |
|                        |               |                 |   |
