

Multiply Decimals and Whole Numbers

Let's multiply whole numbers by tenths and hundredths.

Warm-up

True or False: Place Value Products

Decide if each statement is true or false. Be prepared to explain your reasoning.

- $100 \times 0.01 = 1$

- $10 \times 0.1 = 0.01$

- $10 \times 0.01 = 0.1$

Activity 1

Multiply Decimals by Whole Numbers

How many do you see?

Find the value of each expression in a way that makes sense to you. Explain or show your reasoning. Use the diagrams if they are helpful.

1. 2×0.7

2. 2×0.08

3. 2×0.78

Activity 2

Using Whole Number Products

1. Find the value of each expression. Explain or show your reasoning.

a. 3×0.5

b. 5×0.3

c. 7×0.02

2. Kiran writes this explanation to describe the strategy he used to multiply a whole number by some tenths:

“I just turn the numbers into whole numbers, multiply them, and call them tenths.”

Fill in the blanks to show how Kiran’s strategy works.

$$6 \times 0.7 = 6 \times \text{ ______ } \text{ tenths} = \text{ ______ } \text{ tenths} = 4.2$$

$$6 \times 0.07 = 6 \times \text{ ______ } \text{ hundredths} = \text{ ______ } \text{ hundredths} = \text{ ______ }$$
