Slopes, Vertical Intercepts, and Graphs
Situation A

Lin's dad bought a tablet. He pays the same amount each month for a subscription to a movie streaming service. The graph represents how much money he spent, $y$, for the tablet and $x$ months of the service. The slope of the line is 10.

Slopes, Vertical Intercepts, and Graphs
Situation B

The graph represents the perimeter, $y$, of a square whose side length is $x$. The slope of the line is 4.

Slopes, Vertical Intercepts, and Graphs
Situation C

Diego puts his piggy bank on his desk. Each week he adds the same amount of money to his bank. The graph represents the amount in the piggy bank, $y$, after $x$ weeks. The slope of the line is 5.

Slopes, Vertical Intercepts, and Graphs
Situation D

Noah starts his piggy bank off with money he's saved helping a neighbor out. Each month he adds the same amount of money to his bank. The graph represents the amount in the piggy bank, $y$, after $x$ months. The slope of the line is 15.

Slopes, Vertical Intercepts, and Graphs
Situation E

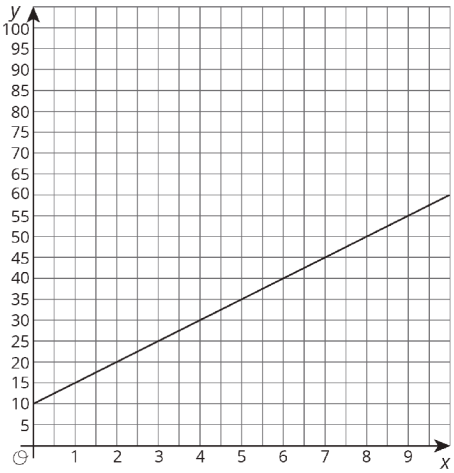

Elena adds a quarter to her piggy bank every day. The graph represents the number of dollars, $y$, in her piggy bank $x$ days after she put the piggy bank in the closet. The slope of the line is 0.25.

Slopes, Vertical Intercepts, and Graphs
Situation F

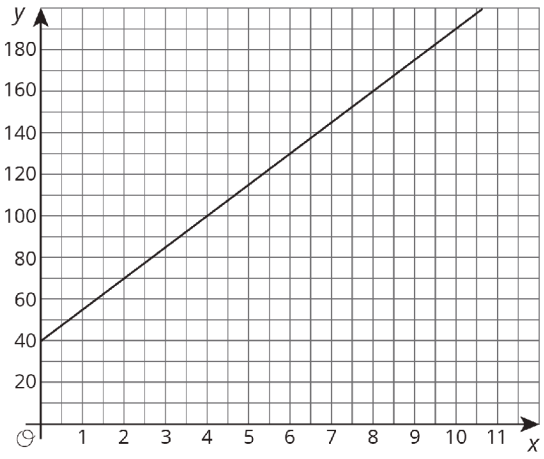

Lin's mom pays the same amount each month for internet service for her business tablet. The graph represents how much money she spent, $y$, for $x$ months of service. The slope of the line is 40.
