

Make Sense of Equations

Let's write equations and find the number that makes an equation true.

Warm-up

Number Talk: Make 10

Find the unknown value mentally.

$$\bullet 6 + 4 = \square$$

$$\bullet 6 + \square = 10$$

$$\bullet 10 = 4 + \square$$

$$\bullet 10 = \square + \square$$

Section D Summary

- We learned more about equations that show an unknown total or unknown addend.

We matched equations to story problems.

We also wrote equations to match story problems.

- Lin has 5 bingo chips on her board.
She also has some chips on the table.
All together she has 9 bingo chips.
How many chips does Lin have on the table?

$$9 - 5 = \square$$

and

$$5 + \square = 9$$

- We thought about how addition and subtraction are related.

We used both to solve a story problem.

9 students play bingo.

3 students use blue chips to cover their boards.

The other students use yellow chips.

How many students use yellow chips?

Clare writes $3 + \square = 9$.

Jada writes $9 - 3 = \square$.
