

# Subtract within 1,000

Let's subtract in a way that makes sense.

## Warm-up

### True or False: Equations Based on Place Value

Decide if each statement is true or false. Be prepared to explain your reasoning.

- $2 \text{ hundreds} + 3 \text{ tens} + 4 \text{ ones} = 2 \text{ hundreds} + 3 \text{ tens} + 14 \text{ ones}$
- $2 \text{ hundreds} + 3 \text{ tens} + 4 \text{ ones} = 1 \text{ hundred} + 13 \text{ tens} + 4 \text{ ones}$
- $1 \text{ hundred} + 13 \text{ tens} + 4 \text{ ones} = 1 \text{ hundred} + 12 \text{ tens} + 14 \text{ ones}$

## Activity 1

### Jada's Thinking

Lin's diagram

Jada's equations

$$500 - 100 =$$

$$\begin{array}{r} 70 \\ 80 \end{array} - 40 =$$

$$\begin{array}{r} 12 \\ 1 \end{array} - 5 =$$

1. a. Discuss how Jada's equations match Lin's diagram.
- b. Finish Jada's work. Find the value of  $582 - 145$ .

2. Jada is thinking about how to find the value of  $402 - 298$ .

- a. Jada knows a way to count on to find the difference. She shows her thinking, using a number line.

Explain Jada's thinking.

---

---

---

- b. Jada says she can't decompose to find the value of  $402 - 298$ , because there aren't any tens. Do you agree? Show your thinking, using objects, drawings, numbers, or words.

## Activity 2

### Find It Your Way

Find the value of each expression in a way that makes sense to you. Show your thinking, using drawings, numbers, or words.

1.  $535 - 214$

2.  $700 - 589$

3.  $683 - 398$

4.  $918 - 608$

5.  $735 - 457$

6.  $602 - 487$

## Section C Summary

We learned ways to subtract 3-digit numbers, using place value. We used base-ten blocks, diagrams, and equations to subtract hundreds from hundreds, tens from tens, and ones from ones. We decomposed a hundred, a ten, or both to subtract by place. We looked closely at numbers in expressions. We planned how to decompose. We used friendly numbers or the relationship between addition and subtraction.

Base-Ten Diagram  
 $256 - 64$

Unit Form  
 $726 - 558$
