

Directions:

- Partner A:
 - Choose a target length in quarter inches (up to 10).
 - Begin to draw a line with a straightedge.
- Partner B:
 - Say "Stop!" when you think the length of the line is equal to the target measurement.
- Both partners measure the line to the nearest quarter inch and find the difference between its actual length and the target measurement. The difference is Partner B's score for the round.
- Take turns. After 8 rounds, the partner with the lower total score wins.

| round | Partner A | | | Partner B | | |
