Going on a Field Trip, Spanish

A Clare

Si cada boleto cuesta $20, el costo total es $45 \times 20 = 900$.

$18 es $2 menos que $20, entonces a de 45×20 (900) se le resta 45×2 (90).

La diferencia es 810.

B Kiran

$$
\begin{aligned}
10 \times 18 &= 180 \\
20 \times 18 &= 360 \\
40 \times 18 &= 720 \\
5 \times 18 &= \ \ 90 \\
45 \times 18 &= (40 \times 18) + (5 \times 18) \\
&= 720 + 90 \\
&= 810
\end{aligned}
$$

Going on a Field Trip, Spanish

C Han

100 boletos cuestan $1,800.

50 boletos cuestan la mitad de $1,800, que es $900.

45 boletos es menos que 50 boletos, así que tendrán suficiente dinero.

D Tyler

$$18 = 9 \times 2$$
$$2 \times 45 = 90$$

$$\begin{aligned} 18 \times 45 &= 9 \times 2 \times 45 \\ &= 9 \times 90 \\ &= 810 \end{aligned}$$

Going on a Field Trip, Spanish

E Mai

$$400 + 320 + 50 + 40 = 810$$
