

Unit 1 Lesson 2: Constructing Patterns

1 Math Talk: Why Is That True? (Warm up)

Student Task Statement

Here are 2 circles with centers A and B .

Based on the diagram, explain how you know each statement is true.

The length of segment EA is equal to the length of segment EB .

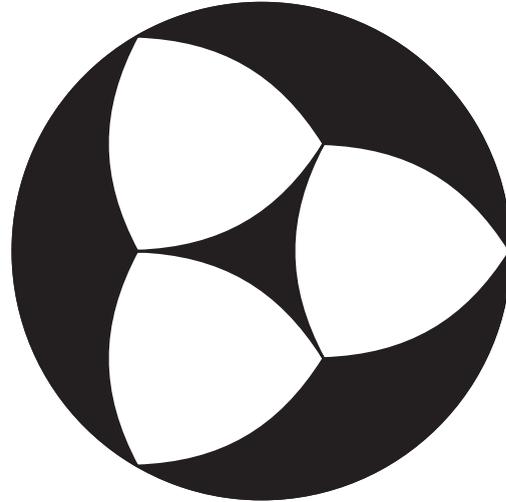

Triangle ABF is equilateral.

$$AB = \frac{1}{3}CD$$

$$CB = DA$$

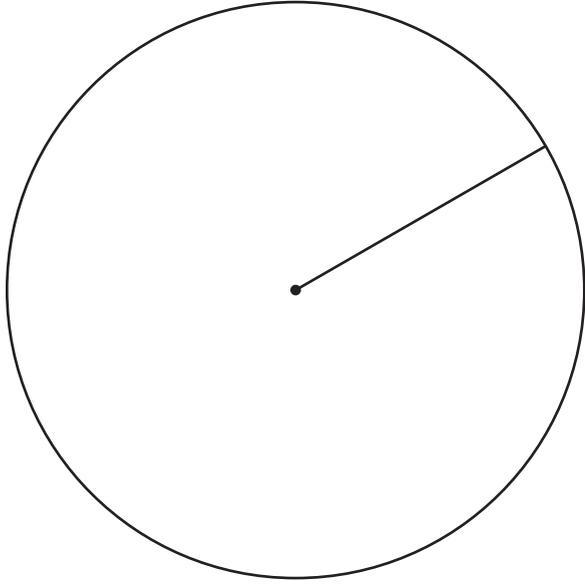

2 Make Your Own

Images for Launch

Student Task Statement

Use straightedge and compass moves to build your own pattern using the circle and radius as a place to start. As you make your pattern, record each move on a separate sheet of blank paper. Use precise vocabulary so someone can make a perfect copy without seeing the original. Include instructions about how to shade or color your pattern.

3 Make Someone Else's

Student Task Statement

Follow the instructions precisely to recreate the pattern.
