

Solve Story Problems

Let's solve story problems and share different ways to add and subtract.

Warm-up

Act It Out: Computers at the Library

5 people work on the computers.

3 more people come to the computers.

How can you act out this story?

Activity 1

Solve a Story Problem

6 people come to story time.

3 more people join the group.

How many people are at story time now?

Activity 2

How Did You Solve It?

1. 9 books are on a cart.

The librarian takes 2 of the books.

How many books are still on the cart?

Show your thinking using drawings, numbers, or words.

2. 7 children work on an art project.

2 children join them.

How many children work on the art project now?

Show your thinking using drawings, numbers, or words.
