

K.1 End-of-Unit Assessment (Interview Assessment with Translated Prompts)

**Materials Needed** Two cups with 5 cubes each in them.

| Student Names                                                                                                                                                                                                                                                               |                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Question                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                       |
| 1. "Por favor cuenta hasta el número más grande que puedas." // "Can you please count as high as you can?"<br>When the student stops, ask,<br>"¿Sabes qué número sigue después de ____?" // "Do you know what number comes after ____ (the number the student stopped at)?" | Note how high the student counts and any mistakes or omissions the student makes.                                                                                                                     |
| 2. Pour 5 cubes onto the table in front of the student. Ask, "¿Cuántos cubos hay en la mesa?" // "How many cubes are on the table?"                                                                                                                                         | Note whether the student:<br>____ touches or moves each object one time<br>____ says one number for each object<br>____ says the numbers in order<br>____ keeps track of cubes that have been counted |
| 3. When the student finishes counting, ask, "Entonces, ¿cuántos cubos hay?" // "So how many cubes are there?"                                                                                                                                                               | Note whether the student:<br>____ answers with the last number they said<br>____ (even if that last number was inaccurate).                                                                           |
| Go to question 4a or 4b.                                                                                                                                                                                                                                                    | Note whether the student:<br>____ answers with the last number they said<br>____ (even if that last number was inaccurate).                                                                           |

| Student Names                                                                                                                                           |                                                                                                                                                                                                           |                                                                                                                                                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Question                                                                                                                                                |                                                                                                                                                                                                           |                                                                                                                                                                                                           |
| 4.a.i If the student answers with a number other than 5, remove 2 cubes and ask, “¿Cuántos cubos hay en la mesa?” // “How many cubes are on the table?” | Note whether the student:<br>_____ touches or moves each object one time<br>_____ says one number for each object<br>_____ says the numbers in order<br>_____ keeps track of cubes that have been counted | Note whether the student:<br>_____ touches or moves each object one time<br>_____ says one number for each object<br>_____ says the numbers in order<br>_____ keeps track of cubes that have been counted |
| 4.a.ii When the student finishes counting, ask, “Entonces, ¿cuántos cubos hay?” // “So how many cubes are there?”                                       | Note whether the student:<br>_____ answers with the last number they said<br>_____ (even if that last number was inaccurate).                                                                             | Note whether the student:<br>_____ answers with the last number they said<br>_____ (even if that last number was inaccurate).                                                                             |
| 4.b.i If the student answers with 5 cubes, pour out the other 5 cubes and ask, “¿Cuántos cubos hay en la mesa?” // “How many cubes are on the table?”   | Note whether the student:<br>_____ touches or moves each object one time<br>_____ says one number for each object<br>_____ says the numbers in order<br>_____ keeps track of cubes that have been counted | Note whether the student:<br>_____ touches or moves each object one time<br>_____ says one number for each object<br>_____ says the numbers in order<br>_____ keeps track of cubes that have been counted |
| 4.b.ii When the student finishes counting, ask, “Entonces, ¿cuántos cubos hay?” // “So how many cubes are there?”                                       | Note whether the student:<br>_____ answers with the last number they said<br>_____ (even if that last number was inaccurate).                                                                             | Note whether the student:<br>_____ answers with the last number they said<br>_____ (even if that last number was inaccurate).                                                                             |
