

# Standard Algorithm: Multi-digit Numbers, with Composing

Let's multiply with the standard algorithm and compose new units.

## Warm-up

### Number Talk: Three Factors

Find the value of each product mentally.

- $(2 \times 3) \times 10$
- $(2 \times 40) \times 10$
- $(2 \times 200) \times 10$
- $(2 \times 243) \times 10$

## Activity 1

### Compose a New Unit

- Find the value of  $241 \times 23$ .
- Lin uses the standard algorithm to find the value of  $241 \times 23$ .

$$\begin{array}{r} \phantom{0}1 \\ 241 \\ \times 23 \\ \hline 723 \\ + 4,820 \\ \hline 5,543 \end{array}$$

- Where do you see  $241 \times 3$  in Lin's work?

---

---

- Where do you see  $241 \times 20$  in Lin's work?

---

---

- What does the 1 above 241 represent in Lin's calculation?

---

---

3. Use the standard algorithm to find the value of  $182 \times 41$ .

4. Use the standard algorithm to find the value of  $304 \times 23$ .

## Activity 2

### All the Products

Find the value of each product, using the standard algorithm.

$$647 \times 9$$

$$647 \times 50$$

$$647 \times 59$$

$$264 \times 38$$
