

# Solve Problems with Decimals

Let's round and order decimals to solve problems.

## Warm-up

### Notice and Wonder: The Luge

What do you notice? What do you wonder?

A	B
48.532	82.13
48.561	82.75
48.626	82.81
48.634	83.07
48.708	82.80

## Activity 1

### How Accurate Is It?

The table shows the race times for 5 luge athletes.

athlete	time (seconds)
Athlete 1	48.532
Athlete 2	48.561
Athlete 3	48.626
Athlete 4	48.634
Athlete 5	48.708

1. How would the results of the race change if the times were recorded to the nearest second?

---

---

2. How would the results of the race change if the times were recorded to the nearest tenth of a second?

---

---

3. How would the results of the race change if the times were recorded to the nearest hundredth of a second?

---

---

4. An athlete records a time of 48.85 seconds to the nearest hundredth of a second. What could that time be if it was recorded to the thousandth of a second?
5. An athlete records a time of 48.615 seconds to the nearest thousandth of a second. What could that time be if it was recorded to the nearest hundredth of a second?

## Activity 2

### Compare Speeds

The table shows the top speeds of 5 luge athletes.

athlete	speed (miles per hour)
Athlete 1	82.13
Athlete 2	82.75
Athlete 3	82.81
Athlete 4	83.07
Athlete 5	82.80

1. List the speeds in decreasing order.
2. Do any of these athletes have the same top speed if rounded to the nearest tenth of a mile per hour? To the nearest mile per hour?
3. A sixth athlete's top speed is faster than Athlete 5's but slower than Athlete 3's. What could the top speeds of these 3 athletes be if they were each measured to the nearest thousandth of a mile per hour?

## Section A Summary

We represented decimals to the thousandths place.

The shaded region of the diagram represents 0.542.

- The 5 shaded rows are each a tenth or 0.1
- The 4 shaded small squares are each a hundredth or 0.01.
- The 2 shaded tiny rectangles are each a thousandth or 0.001.

The decimal 0.542 can be represented in other ways.

- $\frac{542}{1,000}$
- five hundred forty-two thousandths
- $(5 \times 0.1) + (4 \times 0.01) + (2 \times 0.001)$

We also learned how to locate 0.542 on a number line.

The number line shows that 0.542 is closer to 0.54 than to 0.55. So, 0.542 rounded to the nearest hundredth is 0.54.
