

Rolling for Fractions Stage 5 Recording Sheet

Each partner:

- Roll 3 number cubes. Use the numbers to create a division expression with a whole number and a fraction.
- Write the equation to represent the quotient
- Check your partner's work to make sure you agree.
- Determine the number of points each partner gets:
 - 5 points for the largest quotient
 - 3 points for the smallest quotient

Repeat for the next round. The partner who has the most points once the recording sheet is full wins the game.
